

What makes LEGACY matting the lowest cost matting option?

Before... then AFTER repeated foot traffic

TYPICAL
MATTING

VS.

Typical rental mats and carpet-top vinyl mats don't have a rubber-reinforced bi-level surface. With everyday use the pile crushes, allowing dirt, sand, salt and water to be tracked into the building.

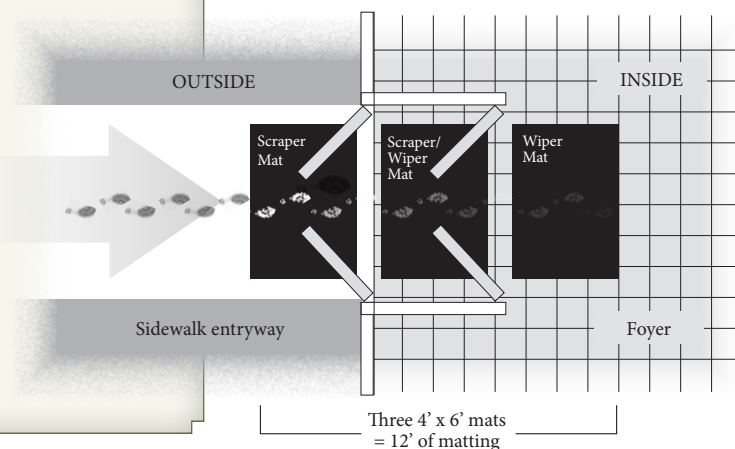

With LEGACY Matting, dirt, sand, salt and water are wiped and scraped from shoe soles and deposited in the base of the mat, where it cannot be tracked into the building.

LEGACY matting can help your company stay IN THE GREEN!

- LEGACY matting reduces the amount of cleaning chemicals and floor finishes needed to keep floors clean
- LEGACY matting helps prevent dust and fine particulates from entering the building, improving IAQ (indoor air quality)
- All LEGACY matting uses recycled content
- Using LEGACY matting can help your company earn LEED certification points

How much entry matting do I need?

85% to 95% of dirt and water can be stopped with 10 to 15 feet of matting.

Legacy CLASSIC

- Indoor-Outdoor, Scraper-Wiper Entrance Mat
- 24 oz/sq yd solution dyed polypropylene fabric is highly stain resistant
- Rubber backing contains 20% recycled post-consumer rubber from car tires

- Earth friendly 30 oz/sq yd 100% post consumer PET fabric reclaimed from plastic bottles
- Rubber backing contains 20% recycled post-consumer rubber from car tires
- Recommended for commercial buildings, hotels, restaurants, healthcare facilities, office buildings and more

Dirt, sand, salt and water that gets tracked into your building is unsightly and unsafe. It can also cost you *big bucks* to get rid of!

- 70% to 80% of dirt, dust, and moisture that is in a facility comes through the entryway
- It can cost as much as \$600 to remove a pound of dirt, according to the International Sanitary Supply Association
- As few as 150 people entering a building can track in one pound of dirt in a five day work week, costing \$30,000 annually to remove
- LEGACY mats stop more dirt, sand, salt and water at the door than other mats, making LEGACY mats your long term, low cost solution

Stop dirt, sand, salt and water *at the door* with LEGACY matting.

LEGACY MATTING takes dirt and water below the walking surface of the mat

TYPICAL MATTING allows dirt and water to remain on top of the walking surface
